REASONS FOR ALLOWANCE

1. Claims 3 and 4 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Yamada (JP 61-228140 A) disclosed, as shown in fig. 1-3, a vibration isolating mount device for elastically supporting one of left or right end portions of a power plant mounted on a vehicle with a length direction of the power plant aligned in a traverse direction of a body of the vehicle, said device having an oscillation limiting mechanism (fig. 3), wherein said oscillation limiting mechanism comprises: a receiving member 6, 8; a rubber portion 2 and a core body 14 made of a material higher in stiffness than the rubber portion and provided integrally with the rubber portion in a single piece so as to revolve around an axis in the vehicle body traverse direction by a predetermined angle or more and the receiving member easily becomes shear-deformed in a vertical direction owing to revolving of the core body even when the rubber portion in the receiving member is compressed in the vehicle body longitudinal direction because of rolling of the power plant. However Yamada failed to disclose the hollow portion is formed so as to communicate with outside the rubber portion and at least one of inner walls in front and rear portions of the rubber portion enclosing the hollow portion has a swell portion swelling relatively into the hollow portion on one of upper and lower sides thereof, the core body being embedded at least in the swell portion.

The aforementioned limitations and the arrangements thereof are not taught in the prior art. In light of the foregoing, the claims of present application are found to be patentable over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
